

## PROJECT MAP

### Projects in Progress:

- I-80: State Street to 1300 East
- 10400 South: Redwood Road to Bangerter Highway
- 11400 South: Bangerter Highway to State Street
- 3500 South: Bangerter Highway to 2700 West
- I-15 EXPRESSLink: 500 North to I-215 in Davis County
- S.R. 68 Redwood Road: Bangerter Highway to Saratoga Springs

### Emerging Projects:

- I-80: 2300 East Bridge Replacement
- I-215 East: 6200 South Exit to 2000 East
- S.R. 48 - 7800 South: 2700 West to 4800 West
- I-15: 7200 South to 9000 South
- 700 East: Carnation to 11400 South and 11400 South to 12300 South
- S.R. 201: Bangerter Highway to 5600 West
- I-215: 4700 South to S.R. 201
- S.R. 201: I-80 to S.R. 202

Avoid road construction delays,  
find alternate routes and save  
time for more important things.

# SALT LAKE VALLEY

## TRANSPORTATION PROJECTS | SPRING 2009

### UDOT PROJECTS FOR 2009

UDOT is pleased to provide this newsletter to let you know when and where to expect road construction and travel impacts during this year's construction season. Its intent is to offer general overviews and contact information for high profile road projects in the Salt Lake Valley. You are encouraged to visit project websites or call the project contacts listed here for more specific, and updated information.

The past year has brought unprecedented financial challenges on both national and state levels. Now, more than ever, it is important that resources be used wisely to build essential infrastructure, while maintaining and creating the jobs that fuel our economy. Despite concerns earlier this year about project funding, state leadership has assured UDOT that revenue streams for transportation projects will remain viable. Federal stimulus dollars have also been made available.

Consequently, UDOT is moving ahead full steam with much-needed roadway improvements throughout the Salt Lake Valley. We believe it is our obligation to keep you well informed about these projects and other UDOT activities that may affect your commutes.

To meet Utah's goals of reducing transportation congestion, improving air quality and reducing energy consumption, the state of Utah is asking residents and businesses to engage in TravelWise, a set of transportation strategies that encourage drivers to use creative alternatives to save travel time and resources. More information is available at [www.travelwise.utah.gov](http://www.travelwise.utah.gov).

By planning ahead and utilizing the information provided through TravelWise and this newsletter, UDOT hopes to make your summer more enjoyable and productive as you anticipate safer, less congested roadways ahead.

\*This publication is meant to provide updates for many of UDOT's high profile projects in the Salt Lake Valley. More information on other UDOT projects and those sponsored by local governments can be found online at: [www.udot.utah.gov](http://www.udot.utah.gov).

### INSIDE:

- I-80: State Street to 1300 East**  
*New travel lanes and bridges will bolster infrastructure.*
- 10400 South: Bangerter Highway to Redwood Road**  
*The project will expand 10400 South to two travel lanes each direction and accommodate bike lanes and bus service.*
- 11400 South: Bangerter Highway to State Street**  
*The project will add a new interchange to I-15, connect 11400 South between I-15 and 1300 West, and add a railroad bridge at 500 West.*
- 3500 South: Bangerter Highway to 2700 West**  
*Improvements to 3500 South include new travel lanes and dedicated lanes for UTA's Bus-Rapid-Transit (BRT) service.*
- I-15 EXPRESSLink: 500 North to I-215 in Davis County**  
*New Express Lanes will increase capacity on I-15.*
- S.R. 68 Redwood Road: Bangerter Highway to Saratoga Springs**  
*Improvements to S.R. 68 include new travel lanes, traffic signal and intersection improvements, wildlife undercrossings and dedicated bike lanes.*
- Emerging Projects**

Project Timeline	Spring 2008	Summer 2008	Fall 2008	Winter 2008	Spring 2009	Summer 2009	Fall 2009	Winter 2009	Spring 2010	Summer 2010	Fall 2010	Winter 2010
I-80: State Street to 1300	Reconstruction of eastbound lanes and bridges								Project completion			
10400 South: Bangerter Highway to Redwood Road	Construction								Project substantially completed			
11400 South: Bangerter Highway to State Street	Construction								Project completion			
3500 South: Bangerter Highway to Redwood Road	Construction								Project completion			
I-15 EXPRESSLink: 500 North to I-215 in Davis County	Northbound widening, 1100 North bridge reconstruction								Southbound widening, U.S. 89 bridge replacement			
S.R. 68 Redwood Road: Bangerter Highway to Saratoga Springs	Construction								Beck Street bridge replacement			
									Project completion			

PROJECTS IN PROGRESS

I-80: STATE STREET TO 1300 EAST

The overhaul of I-80 is nearing completion between State Street and 1300 East, bringing with it a wider, safer travel corridor. The new and improved I-80 includes an additional general purpose travel lane in each direction, auxiliary lanes between interchange ramps, new freeway bridges, and durable concrete pavement.

Reconstruction of westbound I-80 is now complete, including new lanes and bridges. Traffic has been moved to the new lanes while crews work through the summer to reconstruct eastbound lanes. Lanes have been narrowed and the speed limit has been reduced to 55 mph, which is being strictly enforced. Truck traffic is restricted in the work zone. Motorists should expect temporary interchange ramp and cross-street closures through project completion, which is expected by fall 2009.

10400 SOUTH: BANGERTER HIGHWAY TO REDWOOD ROAD

The 10400 South project will widen the roadway between Bangerter Highway and Redwood Road to include two travel lanes in each direction, a center median, ten-foot shoulders, bicycle lanes, curb and gutter, six-foot sidewalks on both sides, and intersection improvements at 3200 West, 2700 West, and 2200 West. Roadway improvements include retaining walls and pocket parks. Overhead utilities (power, phone and cable) will be moved underground. The new roadway design will also improve safety, pedestrian and bicycle access, bus service, and garbage collection.

Two lanes of travel will remain open throughout construction. The speed limit has been reduced to 25 mph to accommodate construction activities. Motorists should proceed with caution and expect minor delays while traveling through the project area. The project is scheduled to reach substantial completion by October 2009.

11400 SOUTH: BANGERTER HIGHWAY TO STATE STREET

The 11400 South project is designed to improve east-west travel, ease traffic congestion, and support the transportation needs of the growing communities of southern Salt Lake County.

- The project will provide improvements to 11400 South, such as:
- A new I-15 interchange at 11400 South
  - New merging lanes on I-15 between 10600 and 12300 South
  - A widened 11400 South between State Street and Bangerter Highway
  - A new east-west connection on 11400 South between 700 West and 1300 West

- A new bridge and pedestrian crossing over the Jordan River, and
- A new bridge over Union Pacific Railroad tracks

UDOT plans to limit lane closures and other traffic impacts on I-15 and along 11400 South, however, a temporary closure will be necessary between 300 West and 445 West while the bridge is constructed over the railroad. The closure is expected to begin in mid- to late summer 2009 and will last approximately six months. Major construction began this spring. Project completion is anticipated for late fall 2010.

3500 SOUTH: BANGERTER HIGHWAY TO 2700 WEST

Reconstruction and widening activities are underway on 3500 South between Bangerter Highway and 2700 West. The project will enhance east-west travel by expanding the roadway to three lanes in each direction and adding dedicated center median lanes for the Utah Transit Authority's (UTA) Bus-Rapid-Transit (BRT) service. Reversible lanes are being used to minimize traffic impacts during peak travel times. Project completion is expected by summer 2010. During construction, motorists should expect travel and turn lane restrictions.

I-15 EXPRESSLINK: 500 NORTH TO I-215 IN DAVIS COUNTY

EXPRESSLink will increase capacity on I-15 by adding Express Lanes in each direction from 500 North to the I-215 interchange in Davis County. Bridges at Beck Street, U.S. 89, 1100 North and 800 North will also be replaced. The bridges at 1100 North and 800 North will be replaced by one bridge at 1100 North which will maintain all current traffic movements.

Moveable barriers will be used from May 2009 to Sept 2010 to maintain a third lane of traffic during peak travel times. Accelerated bridge construction will be used to construct and place the new U.S. 89 and 1100 North structures. The new Beck Street structure will be built alongside the existing structure. Construction will be phased to maintain as many travel lanes as possible while completing the necessary bridge and roadway widening work. These techniques are being implemented to reduce impact on the traveling public during construction.

EXPRESSLink is a design-build project with an accelerated schedule to save time and tax dollars.

S.R. 68 REDWOOD ROAD: BANGERTER HIGHWAY TO SARATOGA SPRINGS

Construction continues on the S.R. 68 (Redwood Road) widening project between Bangerter Highway and Saratoga Springs. The project will expand the roadway to five lanes—two lanes in each direction with a center turn lane. Other features include traffic signals and intersection improvements, three wildlife undercrossings, and widened shoulders with a dedicated bike lane on each side of the road.

During construction, one lane will be maintained in each direction. Travel lanes are narrowed and turning movements limited in some areas, but access will be maintained for area residences and businesses. Construction is expected to conclude in fall of 2009.

EMERGING PROJECTS

I-80: 2300 EAST BRIDGE REPLACEMENT

This federal stimulus project will replace two bridges over I-80 at 2300 East using accelerated bridge construction methods. Alternate routes will keep traffic moving during the bridge placements, which are projected for fall 2009.

I-215 EAST: 6200 SOUTH EXIT TO 2000 EAST

Crews will grind and repair the concrete pavement in this area to improve safety and create a smoother ride. The project begins in early April and is expected to be complete by late June.

S.R. 48 - 7800 SOUTH/NEW BINGHAM HIGHWAY: 2700 WEST TO 4800 WEST

UDOT will widen S.R. 48 and provide drainage and safety improvements between 4800 West to 2700 West starting summer 2009. The roadway will also be resurfaced during the process.

I-15: 7200 SOUTH TO 9000 SOUTH & 9000 SOUTH RAMP

Work begins summer 2009 on a design-build project that will add an auxiliary lane to southbound I-15 between 7200 South and 9000 South, as well as widen the 9000 South on-ramp to northbound I-15.

700 EAST: CARNATION TO 11400 SOUTH & 12300 SOUTH INTERSECTION

This 12-month project will reconstruct 700 East to include two lanes in each direction with a center turn lane, bicycle lanes, continuous sidewalks and medians at key intersections. The 12300 South intersection will be reconstructed and widened. Work begins early fall 2009.

S.R. 201: BANGERTER HIGHWAY TO 5600 WEST

UDOT will add one travel lane in each direction on State Route (SR) 201 from Bangerter highway to 5600 West. New lanes will increase capacity and improve roadway safety. The project area will be resurfaced. Construction will occur in the summer of 2009.

I-215: 4700 SOUTH TO S.R. 201

UDOT will replace concrete on both northbound and southbound lanes on I-215 from 4700 South to S.R. 201. Construction will occur in the spring and summer of 2009.

S.R. 201: I-80 TO S.R. 202

Starting summer 2009, UDOT crews start construction for an additional lane on S.R. 201 between S.R. 202, ending east of I-80. The new lane will reduce traffic congestion along the roadway and improve safety for motorists. The drainage system will also be improved.
